Jon William Taylor

Information Systems Professional

256-604-6501 | Huntsville, AL | jwtaylor659@gmail.com | https://linkedin.com/in/jon-william-taylor | https://github.com/JWT890 | https://jwt890.github.io/website/ | US Citizen

Summary of Qualifications

Analytical Information Systems professional with experience in technical support, systems analysis, customer service, and process improvement. Skilled in analyzing problems, developing practical solutions, documenting processes, and communicating effectively with technical and non-technical stakeholders. Proficient in Microsoft 365, Windows, Linux, Python, Excel, Active Directory, and enterprise systems, with a strong foundation in business operations and information systems. Adaptable, analytical, and detail-oriented professional who thrives in fast-paced, team-oriented environments. Eligible to obtain and maintain a security clearance.

Professional Experience

Test Center Administrator Proctor Part Time June 2026 – Present

PSI Services LLC, Huntsville, AL

- Maintain secure testing environments by enforcing exam integrity, identity verification, and standardized compliance procedures for 50+ certification examinations.
- Assist candidates with workstation setup, login processes, and basic technical troubleshooting in a Windows-based testing environment to ensure smooth exam delivery.
- Monitor live testing sessions to enforce security policies and operational procedures, ensuring adherence to strict testing regulations and escalation protocols by 100%.
- Deliver professional customer support while documenting incidents, resolving procedural issues, and maintaining confidentiality of sensitive candidate and examination data.

IT Technician Project Team Technician January 2025-March 2025

Cyburity, Huntsville, AL

- Delivered Tier 1/2 IT support for 25+ clients using Atera, troubleshooting hardware, software, network, and Microsoft 365 issues to maintain system uptime and improve end-user productivity.
- Developed and maintained a database to identify and prioritize the top 80/20 security issues, improving resource allocation and increasing response efficiency by 50%.
- Resolved account, access, and system-related issues through ticket-based support using Active Directory and Atera, ensuring secure user access and streamlined service delivery.
- Imaged and configured Windows workstations using Ventoy bootable media, performing OS installations, driver configuration, and post-deployment setup for end users.

Cybersecurity Specialist Intern Technical II September 2023-December 2023

SAIC, Huntsville, AL

- Developed and executed unit tests using Jest and Unittest for Python 3.11 and JavaScript, ensuring robust code validation and reliability.
- Enhanced software performance by analyzing test data and implementing targeted optimizations, cutting runtime errors.
- Effectively communicated test strategies, findings, and insights to stakeholders through comprehensive reports and presentations.

Education & Certifications

Bachelor of Science in Business Administration, Grad December 2023

University of Alabama in Huntsville, College of Business, Huntsville, Alabama

Major: Information Systems, Cybersecurity

CompTIA Security+ CE, #L6N9QPGSMNEE1FWR, exp. February 2029

TestOut Linux Pro, #6-1C6-VAJU9N
(ISC)² Certified in Cybersecurity, #1576415, exp. March 2027

Technical Skills

- **Programming & Scripting:** Python, JavaScript, Vue.js, Bash, C++, HTML, SQL, Git, Automation, Scripting.
- **Systems, Networking & Infrastructure:** Linux, Windows 10/11, Windows Server, Active Directory, Group Policy, System Administration, Networking, TCP, DNS, DHCP, VLAN Configuration, Routing, Switching, VPN Support, VMWare, VirtualBox, Proxmox VE, System Imaging & Deployment, System Hardening, Troubleshooting, Root Cause Analysis, Log Analysis, Packet Analysis, Cisco Packet Tracer, Wireshark, AWS.
- **IT Support, Security & Tools:** Help Desk Support, End User Support, Technical Support, Customer Service & Support, Stakeholder Collaboration & Communication, Remote Support, RDP, SSH, Incident Response, Report & Technical Writing, Agile, Jira, ServiceNow, Atera, Microsoft Office Suite, Excel, Word, PowerPoint, Outlook, Teams, SharePoint, Microsoft Office 365, Confluence, Intune, Nessus, STIG Viewer, RMF, NIST, Trend Analysis.

Projects

Proxmox Active Directory Lab

- Designed and deployed a multi-VM virtualized lab using Proxmox, including Active Directory, DNS, DHCP, and domain-joined Windows systems to simulate enterprise infrastructure
- Automated system provisioning and configuration to support user management, Group Policy testing, and security experimentation.

Active Directory via PowerShell

- Automated deployment of Active Directory OUs and provisioned 1000+ user accounts using PowerShell scripting.
- Implemented secure account management practices, including password policies, expiration controls, and account restrictions.

SCCM & Intune Hybrid Endpoint Management Lab (SCCM & Intune)

- Developed a hybrid endpoint management lab using SCCM, Intune, Active Directory, and Windows Server to simulate enterprise device provisioning and administration.
- Implemented OS deployment, software distribution, Group Policy, co-management, and compliance policies across on-premises and cloud-managed Windows endpoints.

Veeam Backup and Disaster Recovery Lab

- Engineered a Veeam disaster recovery lab integrating Proxmox, VMware, Windows Server, Ubuntu, and SMB/Samba for centralized backup and recovery.
- Validated file-level and VM recovery, achieving approximately 5-second file-level RTO, 10.5-minute VM recovery RTO, and ~12-minute RPO through scheduled backups and recovery testing.

n8n Helpdesk Ticket Database Automation

- Built an n8n automation workflow integrating Jira, Google Sheets, Gmail, and Looker Studio to automate help desk ticket tracking, reporting, and notifications.
- Automated Jira ticket extraction, data transformation, database updates, daily email summaries, and dashboard reporting, reducing manual ticket management and improving visibility into support operations.

Enterprise Network Design Project (University of Alabama in Huntsville)

- Designed and implemented enterprise network architecture, integrating routers, switches, and workstations, for seamless, secure connectivity.
- Configured, coordinated, and tested IP-based infrastructure to ensure network stability, resilience, and secure access to application servers.
